Competition Agent evidence workflow

2026-07-17

## 1 Scope and compliance

This report is generated only from persisted rule, data and experiment records. It does not claim unrecorded results.

- Task: image\_segmentation
- Primary metric: global\_water\_iou (maximize)
- Rules require human confirmation: True

## 2 Data audit

Audited files: 5536. Quality issues: 0. Exact duplicate groups: 0.

## 3 Experimental protocol and results

| Experiment | Status | global_water_iou | Change type |
|------------|--------|------------------|-------------|
|------------|--------|------------------|-------------|

No completed validation result is recorded yet.

## 4 Limitations and next steps

All conclusions remain conditional on the official-rule confirmation, data-audit findings and held-out evaluation. The decision memo should be reviewed before the next run.

## 5 Related work candidates

This initial report cites only the manually reviewed candidates. The full automated radar remains a separate evidence record. [3, 2, 1].
